KEYMACRO is a combination of an Autokey with a keyboard, and is designed to provide faster typing speed. The KEYMACRO remembers the typing speed you use to type at. If you type normally, and it's slower than what KEYMACRO remembers, it will catch up to your normal speed. If you type normally, but your typing speed is faster than what KEYMACRO remembers, it will catch up with your normal speed. If you type normally, but your typing speed is slower than KEYMACRO remembers, it will match your normal speed. KEYMACRO can do this automatically, and it can be set to automatically adjust its speed based on your input of the time and number of keys pressed. Create a "WAIT" loop which constantly checks for an incoming key press and either presses a key, or asks you for input, or goes to sleep and monitors for an incoming keypress. This can be used in many situations. For example: - The keyboard can be assigned as a "macro" key. - You can use it in "WAIT" loops to read serial numbers and other numbers or data you get from a hardware device, and press a key on the keyboard to enter the information. - You can assign the "macro" key to another shortcut. - You can program the "macro" key to type a specific word or sentence. You can use this "macro" in many ways. It's simple, useful, easy to use, and it works. Thanks to User: It's a good idea, but what happens when you want to make your own graphic? For example: Instead of a star it could be a logo. Instead of 10, it could be a "points" counter. Because of that I made this application which allows you to create your own logos and pictures. In addition, you can add your own "macros", shortcuts, fonts, special characters and symbols, and so on. It's up to you how you use it! How to use this app: Once you have the application you will be able to add and delete macros, shortcuts, fonts, and special characters. You will also be able to edit the button images, buttons and keyboard, of course. At the top right you will see the position in the application of each button, so you know which one you are currently editing. Keypad shortcuts: To enter a 2edc1e01e8
